Portfolio Website

Technical Skills

Frontend

Angular, React.js, TypeScript, RxJS, NgRx, HTML5, CSS3, Tailwind CSS

Backend

Core Java, Spring Boot, Spring Data JPA, Spring Security, RESTful APIs, Microservices.

Database

MySQL, SQL Server, MongoDB

Tools

Git, Docker, Jenkins, AWS EC2

Concepts

REST APIs, JWT, OAuth2, System Design, DSA

Soft Skills

- Problem Solving and Analytical Thinking
- Communication Skills (Technical and Non-Technical)
- Team Collaboration and Agile Methodologies
- Time Management and Deadline Adherence
- Attention to Detail and Quality Focus

Education

B.Tech./B.E.

Pune University, Maharashtra - 2019

Post Graduate Diploma in Advance Computing(PG-DAC)

CDAC ACTS, Pune - 2022

Profile

Full Stack Developer with 3+ years of experience specializing in Angular, TypeScript, and Spring Boot. Skilled in building scalable PWAs, microservices architectures, and high-performance web applications. Strong expertise in REST APIs, state management (RxJS, NgRx), and modern frontend optimization techniques.

Professional Experience

Aloha Technology Pvt. Ltd. Pune

Software Developer

Jan 2023 – Present | Pune, India

- Developed and maintained high-performance, scalable web applications using Angular, improving overall application efficiency by 30%.
- Implemented lazy loading and code splitting, reducing initial bundle size by 35–45% and improving page load time by 40%.
- Built reusable and modular UI components, accelerating development speed by 25% and ensuring maintainable architecture.
- Collaborated with cross-functional teams to design and deliver responsive, user-centric interfaces using Angular, HTML5, CSS3, and TypeScript.
- Optimized application performance using OnPush change detection, trackBy, and RxJS, reducing unnecessary re-renders and improving UI responsiveness by 20%.
- Integrated front-end with RESTful APIs, ensuring seamless data flow and reducing API response handling errors by 30%.
- Refactored legacy code and resolved critical bugs, improving application stability and reducing production issues by 35%.
- Developed fully responsive and mobile-first designs, increasing user engagement across devices by 25%.
- Conducted unit testing and participated in peer code reviews, improving code quality and reducing defects by 30%.
- Enhanced application performance using caching, debouncing, and throttling techniques, reducing redundant API calls by 40%.
- Documented application architecture, components, and APIs, improving onboarding efficiency for new developers by 20%.
- Stayed up-to-date with modern Angular features and best practices, contributing to continuous improvement in development standards.

Certificates

- Angular (Intermediate) – HackerRank (2025) [🔗](#)
- Namaste React – 2025
- Namaste JavaScript – 2025
- Hacker Been Java Full Stack - 2026

Project Work

AI-Powered Fitness Application | Spring Boot Microservices

Dec 2025 – Jan 2026

Tech Stack: Java, Spring Boot, Spring Cloud, Eureka, Gateway, Kafka, Keycloak, OAuth2, Google Gemini AI, PostgreSQL, MongoDB, REST APIs, Docker.

- Architected a microservices-based fitness platform using Java 17, Spring Boot, and Spring Cloud with independently deployable User, Activity, and AI Recommendation services.
- Implemented event-driven communication using Apache Kafka (Activity Service as Producer, AI Service as Consumer) to trigger real-time AI fitness recommendations via Google Gemini AI API.
- Secured APIs using Keycloak with OAuth2 and PKCE flow, with centralized routing and token validation via Spring Cloud Gateway and service discovery via Eureka Server.
- Applied database-per-service pattern using PostgreSQL and MongoDB, and managed configurations using Spring Cloud Config Server.
- Containerized Kafka and Keycloak using Docker and integrated a React frontend with secured backend APIs through the API Gateway.
