linkedin.com/in/arjun-khade-ba825017b cdacengineer.in

Full Stack Developer with 3.9+ years of experience building enterprise web applications using Angular, TypeScript, RxJS, and NgRx, with backend services developed using Java and Spring Boot. Experienced in RESTful API integration, Spring Data JPA, SQL databases, reusable UI components, and frontend performance optimization. Contributes across UI, API, and database layers in Agile teams, with project experience in healthcare EHR and Progressive Web App (PWA) solutions.

TECHNICAL SKILLS

Frontend: Angular, React.js, TypeScript, RxJS, NgRx, Redux Toolkit, HTML5, CSS3, Tailwind CSS

Backend: Core Java, Spring Boot, Spring Data JPA, Spring Security, RESTful APIs, Microservices.

Database: MySQL, SQL Server, MongoDB

Tools: Git, Docker, Kubernetes, Jenkins, AWS, GCP

Concepts: REST APIs, JWT, OAuth2, System Design, DSA

PROFESSIONAL EXPERIENCE

Software Developer Jan 2023 – Present

Aloha Technology Pvt. Ltd., Pune

- Develop and maintain enterprise web applications end to end, building Angular, TypeScript, and RxJS frontends and Java Spring Boot REST APIs backed by Spring Data JPA and SQL.
- Built reusable, modular UI components, accelerating development speed by 25% and keeping the architecture maintainable.
- Improved frontend performance with lazy loading, code splitting, OnPush change detection, and trackBy, reducing initial bundle size by 35–45% and page load time by 40%.
- Integrated Angular applications with REST APIs using caching, debouncing, throttling, and RxJS operators, reducing redundant API calls by 40% and response-handling errors by 30%.
- Diagnosed and fixed defects across frontend, API, and database layers and refactored legacy code, reducing production issues by 35%.
- Wrote unit tests, participated in peer code reviews, and documented architecture, components, and APIs, improving onboarding efficiency for new developers by 20%.
- Collaborated with cross-functional teams in Agile sprints, from requirements through deployment to development and production environments.

PROJECT WORK

PrecisionCare – Healthcare EHR System JAN 2023 – Present

Tech Stack: Angular 21, TypeScript, RxJS, NgRx, Angular Material, Reactive Forms, Java, Spring Boot, Spring Data JPA, REST APIs, SQL, PostgreSQL, HTML, CSS

Full-stack Electronic Health Record (EHR) platform for Human Service providers, supporting IDD and Behavioral Health workflows with secure, compliant management of patient data.

- Delivered full-stack modules for patient records, assessments, medications, attendance, and reporting, from Angular UI to Spring Boot API and database.
- Designed and developed scalable RESTful APIs with Java, Spring Boot, and Spring Data JPA, implementing the backend business logic for critical healthcare workflows.
- Optimized SQL queries and API performance for high-volume clinical workflows.
- Built responsive Angular 21 components with Angular Material and Reactive Forms, integrated with Spring Boot APIs for secure data operations across modules.

- Delivered client-specific customizations and feature enhancements based on business requirements, without regressions to existing functionality.

Electronic Visit Verification (EVV) PWA Aug 2023 – Dec 2023

Tech Stack: Angular, TypeScript, Angular PWA, Service Workers, HTML, CSS

Developed a Progressive Web App with offline support and native-like experience using Angular PWA and Service Workers.

- Built an installable, offline-capable Progressive Web App, caching static assets and API data with Angular Service Worker.
- Configured the web manifest to enable app installation on devices, and implemented background sync and update handling for a native-like experience.
- Optimized performance and validated with Lighthouse audits.

AI-Powered Fitness Application Dec 2025 – Jan 2026

Tech Stack: Java 17, Spring Boot, Spring Cloud (Eureka, Gateway, Config Server), Kafka, Keycloak, OAuth2, Google Gemini API, PostgreSQL, MongoDB, Docker, React

- Architected independently deployable User, Activity, and AI Recommendation microservices using a database-per-service pattern (PostgreSQL, MongoDB).
- Built an event-driven pipeline with Apache Kafka (Activity Service as producer, AI Service as consumer) to generate real-time fitness recommendations via the Google Gemini API.
- Secured APIs with Keycloak (OAuth2 with PKCE), with centralized routing and token validation through Spring Cloud Gateway and service discovery via Eureka Server.
- Managed configuration with Spring Cloud Config Server, containerized Kafka and Keycloak with Docker, and integrated a React frontend through the API Gateway.

EDUCATION

CDAC ACTS, Pune - 2022
Post Graduate Diploma in Advance Computing (PG-DAC)

Pune University, Maharashtra - 2019
B.Tech./B.E.

CERTIFICATES

- Angular Intermediate – HackerRank 2025
- Java Full Stack - Hacker Been 2026
- Spring Boot Microservices - Udemy 2026
- Namaste React – Namastedev 2025

SOFT SKILLS

- Problem Solving and Analytical Thinking
- Team Collaboration and Agile Methodologies
- Attention to Detail and Quality Focus
- Communication Skills (Technical and Non-Technical)
- Time Management and Deadline Adherence
